

PAPERPORT ONETOUCH SCANNER

The faster, smarter, easier way to scan.

The PaperPort® OneTouch™ is changing the way people think about and use scanners, thanks to its revolutionary integration of hardware and software. The OneTouch is not just an incredibly powerful way to scan; it is the faster, smarter, easier way to fax, copy, e-mail, or publish documents. With its dedicated function buttons and powerful software integration, it is the office tool you have been waiting for.

- **Easy to set up, easy to use**

Just plug the PaperPort OneTouch into your computer's printer port, install the OneTouch software, and you are ready to scan! OneTouch uses your existing parallel port, so there is no need to open the computer to install an interface card, or worry about IRQs, DMAs, SCSI IDs, or other settings. Plus the pass-through connector design allows you to connect your printer, digital camera or other device to the same port as the OneTouch!

- **Push-button convenience for configuring and executing tasks**

The PaperPort OneTouch enhances the way you currently work rather than changing it; simply push a button to scan, fax, copy or print, just like a photocopier or fax machine. Want to e-mail a picture to a relative across the country? OCR an interesting article for editing in Microsoft Word? With the Custom button you can easily do all this and more. OneTouch automatically integrates with the applications on your PC, so all you need to do is push the button.

- **Flexible scanning platform**

Easily scan any kind of document – everything from business cards and memos to books and magazines – with one touch of the scan button. The top of the scanner can even be elevated or removed to accommodate larger-sized documents.

- **Fastest scanner from "Scan to Finish"**

Touch any of the buttons to scan and route just about anything – in seconds. Whether sending a magazine article to your branch office, a corporate press-release to everyone in the organization, or a birthday card to your favorite niece, the PaperPort OneTouch makes the process fast and easy.

This professional-quality 36-bit scanner uses your computer's printer port for fast, efficient scans, while the incredible software integration enables rapid transfer of your scanned file to your fax, e-mail, printer or other applications or devices. OneTouch - that's all it takes.

- **PaperPort software links your scanned papers and pictures with the applications you use every day**

The included PaperPort software is the industry-leading application for organizing and sharing documents on the PC. With over 4 million copies in circulation it has proven itself time and again as the best tool for linking scanners with the applications people use every day.
