

Elements!

The madness of Mercury. The folly of Gold. The wonder of Oxygen. Turn the Periodic Table of Elements into a living, breathing entity.

HANDS-ON ACTIVITY

Discover Chemical Properties Are All In The Family Let your students observe the chemical properties of element families firsthand by combining halide family compounds with metal nitrates and copper sulfate. Contains materials for 30 students working in pairs. Includes: 50 ml (0.1) of copper sulfate, iron nitrate, lead nitrate, silver nitrate, sodium bromide, sodium chloride, sodium iodide, sodium sulfide; a package of 125 microfuge tubes, trays, beryl pipettes, acid/neutral/base paper; plus complete Teacher and Student Guides.

Halides' Family Characteristics Kit #SPSC-731661 \$42.95

HANDS-ON ACTIVITY

Build A Periodic Table Teach the elements by just opening a box. This set of 132 blocks comes in a sturdy wood box with a sliding lid. Build chemical equations, construct a molecular crossword, or play "element bingo" with your class with these hardwood puzzle blocks. The elements on all six faces of 108 cubes are from the same group of the periodic table; the remaining 24 cubes feature extras of common elements.

The Periodic Puzzle Kit #SPSC-733022 \$145.00
