

NINE WORLDS™

hosted by Patrick Stewart

An Online-Enhanced Voyage Through The Solar System

From Copernicus to Galileo, from the Mercury astronauts to the Apollo lunar program, from the Mir Space Station to the Hubble Telescope, Mankind has attempted to unveil the secrets of the planets of our solar system.

Nine Worlds offers you the most complete information about the history and science of our nine planets through a combination of dramatic narrations, inspiring visuals, thrilling audio, plus the most current astronomical and scientific facts. Only Nine Worlds allows you to go online to its proprietary Web site to keep you informed of the most up-to-date information, while connecting you with other space enthusiasts around the world.

Join Patrick Stewart as he explores our Nine Worlds.

The Only Online Exploration of the Solar System

- Take an online journey with the only astronomy software fully integrated with the World Wide Web.
- Identify your primary areas of interest using our proprietary NetProbe™ technology—then go online to explore these areas.
- Marvel at hot links to NASA, Jet Propulsion Laboratories, the Hubble Telescope and hundreds more!
- Connect with other space enthusiasts and leading astronomers.
- Supports the most popular Web browsers. Use your own existing Internet service or sign up with SPRYNET™, included inside!

System Requirements:

Windows 3.1, Win 95: 486/33 MHz (486/66 MHz recommended), 8 MB RAM, 4 MB free hard disk space (10 MB recommended), SVGA monitor (640x480, 256 colors), double-speed CD-ROM drive, 8-bit sound card. Optional: Modem (9600 bps minimum; 14.4k bps or greater recommended).

Macintosh: System 7.0.1 or higher, 68040/25 MHz, 8 MB RAM, 4 MB free hard disk space (10 MB recommended), double-speed CD-ROM drive. Optional: Modem (9600 bps minimum; 14.4k bps or greater recommended).

Intergalactic Entertainment: Explore the Planets

Select any planet from the historic "orrery," then navigate through fascinating facts regarding its physical features, characteristics, moons and geology. Each planet contains an unrivaled collection of information presented through:

- Spectacular full-motion video.
- Over 500 archival satellite and telescope photographs.
- Original Solar System animations, planet illustrations and more.
- Interviews with the world's leading astronomers.
- Dramatic narrations accompanied by an original scoring of "The Planet Suite" by Gustav Holst.

A "Vacation Planner"—an irreverent tour of the planets. Learn facts like: How much would you weigh on Mars? How many years does it take to fly to Jupiter?

Take a Tour Through History with Mankind's View

Enjoy centuries of facts as you scroll through a continuous panorama of major discoveries and events from Ancient Man through the present. Dramatic readings by Patrick Stewart and original illustrations included.
